

# RAW FIBERBOARD SHAPES

- for your custom creations -

**Shapes Unlimited** maintains a complete inventory of fiber tubes. Choose from a wide variety of stocked geometric shapes in various sizes or we will cut the tubes to your custom sizes. These fiber tubes are constructed with multiple layers of heavy weight fiberboard. Their layered construction creates durability and allows sections of tube to combine with other substrates in order to create attractive components with radius corners. Our tubes are wax free which allows you to finish them with paint or high-pressure laminates. They can also be covered with various natural wood veneers. The tubes are an excellent substrate for the construction of columns, table bases, kiosks, P.O.P. displays, store fixtures and exhibit components. Let **Shapes Unlimited** provide the raw materials to get you started on your next project.
